Plastics**

EFFECTUS
CORPORATION

Product Solutions for Roadways, Parks, Garages & More

Using recycled plastics, Effectus makes car stops, speed bumps, and bike lane separators that are durable and meet a variety of requirements.

We also manufacture bollards, fencing and posts from 100% recycled plastic.

Car Stops

Our rugged, high-visibility Car Stops are made from 100% recycled plastics and can be used in a variety of environments.

- Parking Lots
- Commercial and Residential Garages
- Handicapped Zones
- Parks
- Loading Docks

Our Car Stops are resistant to damage from gas, oil, UV light, and moisture.

Speed Bumps

Our industrial, high-visibility Speed Bumps are made from 100% recycled plastics and can be used in

- Roadways
- Parking Lots
- Commercial and Residential Garages
- Handicapped Zones
- Parks
- Loading Docks

Our Speed Bumps are resistant to damage from gas, oil, UV light, and moisture.

Bike Lane Separators

Built for safety and visibility, our Bike Lane Separators are made from 100% recycled plastics and can be used for both cycling and pedestrian safety. Designed for

- Roadways
- Parks
- Parking Lots
- Commercial and Residential Garages

Our Bike Lane Separators are resistant to damage from gas, oil, UV light, and moisture.

- Made from 100% Recycled Plastic
- Available in Yellow, Black, or Gray
- 4.75" x 4.75" x 1.75"
- 10 oz.
- Fluorescent Accents Available

Bike Lane Separators

- Made from 100% recycled plastic
- Available in Yellow, Black, or Gray
- 29" x 7" x 4"
- 16 lb.
- Pre-Drilled Holes
- Fluorescent Strips Available

Environmentally Sound Answers Without Giving Up Options

Our traffic safety products come in a variety of colors and shapes and can be customized for your needs.

Depending upon the desired use, our traffic safety products can be affixed to almost any surface using industrial adhesives or spikes or a combination of both.

Effectus Corporation is a plastics recycling and manufacturing company with facilities in the United States and Mexico. We collect and process post-consumer and post-industrial plastic waste, transforming waste material into a reprocessed pellet that is used to manufacture plastic items.

Our compression molding and heavy-gauge large-sheet thermoforming operations manufacture a variety of standard and customized products.
